SELECTIVE CONSTRUCTION

FOR OUR MERCHANTS

How we win projects — and put your products in them

Step 1

We win the projects

Architects, draftsmen and owners send us their plans. Our pricing is free, so projects come to us first.

Step 2

We control the path

We build it, we build the owner's crew, or we supply the materials — so we decide what goes on the job.

Step 3

Your products go in

We work for you: your products and materials are priced, specified and supplied into our projects.

Step 4

We sub out competitors

When the specification is like for like, we swap competitors' products for yours.

We work for our Merchants. More projects, more of your products on site.

Our services are free until we supply materials, build a crew or build the project ourselves.

Kind regards,
SCL Team

Family owned since 2017
